

Membership Program

Are you interested in advancing the bioeconomy to make your products more sustainable and circular? Join the Renewable Bioproducts Institute (RBI) Member Program for concierge access to the vast capabilities of Georgia Tech, including leading expertise in woody and plant based bio-mass.

Primary research areas cover topics such as lifecycle analysis, efficiency, decarbonization, and AI in manufacturing, packaging, coatings and films, biobased materials and chemicals, and resiliency of biomass supply. RBI brings together companies from across the supply chain representing multiple industries to drive innovative research and adoption of new technologies.

As a member company you will:

- Participate in workshops with GT faculty and other companies, to learn about, discuss, and influence the future of sustainable materials
- Advise and vote on the direction of RBI research, helping to shape the future of sustainable bioproducts
- Interact with graduate students conducting cutting edge research related to your business
- Consult with the Industry Advisory Board, collaborating on the direction of RBI

For more information or to arrange a membership overview contact **Belinda.Vogel@gatech.edu**.
